

AS9100 – Management System for Aerospace

Expand your business into and within the aerospace industry

Would you feel comfortable flying on an airplane that didn't meet the highest level of quality?

As an aerospace supplier or a manufacturer interested in selling to large aerospace OEMs, it is imperative that your products be manufactured using not only the ISO 9001 quality system requirements, but also those specific to the aerospace industry. By conforming to AS9100, your plant and products will fulfill DOD, NASA, and FAA quality requirements.

Manufacturers that attempt AS9100 implementation on their own could take up to 18 months to complete the task. Companies working with GaMEP typically take 6-9 months on average.

➤ GaMEP will:

- Conduct a gap audit and help you develop an implementation plan.
- Coach your team through AS9100 implementation.
- Conduct AS9100 training throughout the organization.
- Assist with initial internal audits and management reviews.
- Conduct a pre-assessment audit.
- Help you correct system issues before the registration audit.

➤ By bringing in GaMEP for ISO 9001 Audits, you will:

Meet the Highest Level of Quality

Reduce Implementation Time

Expand Your Business

Machine Shop Pursues Certification to Expand Business

Over the years, GaMEP has worked with Precision Products to implement and improve their ISO 9001 quality management system (QMS). By earning their QMS, the company has gained new customers and forged into new industries. Next, they wanted to expand into aerospace, but in order to do so, they needed to earn AS9001 certification, which is an extension of ISO 9001.

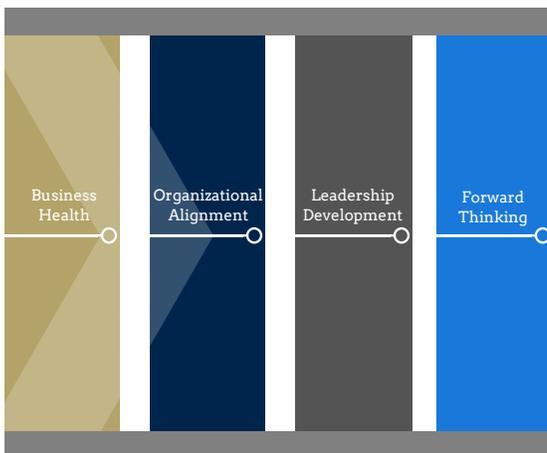

GaMEP helped them attain the new certification, allowing them to pursue an entirely new market and grow their business.

»» Why Work with GaMEP?

Our goals are simple and impactful:

- Understand the current state of your company.
- Learn about your future goals.
- Teach your team to utilize tools and strategies to meet the needs of your organization.
- Advance your company's competitiveness and ensure a sustainable future for manufacturing in Georgia.

Each of our services resides in one of the following four key strategic solutions pillars within the GaMEP Organizational Excellence framework:

The pillars are interconnected to maximize effectiveness. If you have multiple areas to address, request an Organization Excellence assessment.

»» What Sets GaMEP Apart

Each year, GaMEP works with more than 1,000 manufacturers to implement on-site projects, conduct training, and connect manufacturers to Georgia Tech resources and our partners throughout the state. We do this through:

- Federal and state funds that help offset the cost to Georgia manufacturers, making your investment more powerful.
- Access to locally based project managers that have years of experience developing and implementing best practices for manufacturers.
- Immediate and long-term solutions that increase top-line growth and reduce bottom-line costs throughout your organization.

Service areas include: process improvement, quality, robotics, business strategy, technology integration, ISO management systems, energy, sustainability, safety integration, and more.

See what all the "Buzz" is about.
