

Environmental Management Systems / ISO 14001

Reduce the environmental footprint of your activities, products, and services

In the manufacturing industry, a positive public image is essential to the survival of your brand. Manufacturers need to be at the forefront of environmental factors and concerns.

If you are looking to expand locally, nationally, or internationally, it's imperative that you conform to an environmental management system. Whether you conform with ISO 14001 as a multinational organization or become more environmentally responsible, you need a systematic approach to handling the environmental aspects of your business activities. By continually improving your environmental performance you will enhance your reputation with customers, employees, and stakeholders.

➤ GaMEP will:

- Conduct a gap assessment and develop a customized Environmental Management System (EMS) program.
- Coach your team through an EMS implementation plan.
- Conduct internal audits and management reviews.
- Perform a readiness audit to ensure you are prepared for a certification audit.
- Correct system issues before the certification audit.
- Train your EMS stakeholders.

➤ By using GaMEP's EMS ISO 14001 service, you will:

Identify the Causes of Environmental Issues

Improve Compliance

Build Confidence with Stakeholders

○ Advancing Georgia Manufacturing ○

»»» ISO 14001 in Action

Over the past 6 years, GaMEP has conducted more than 60 ISO 14001 implementations

An Augusta chemical manufacturer needed to maintain its ISO 14001 standard, but did not have the time or resources to conduct an internal audit. GaMEP performed an assessment and identified areas in need of corrective action. After GaMEP reported its findings, the manufacturer:

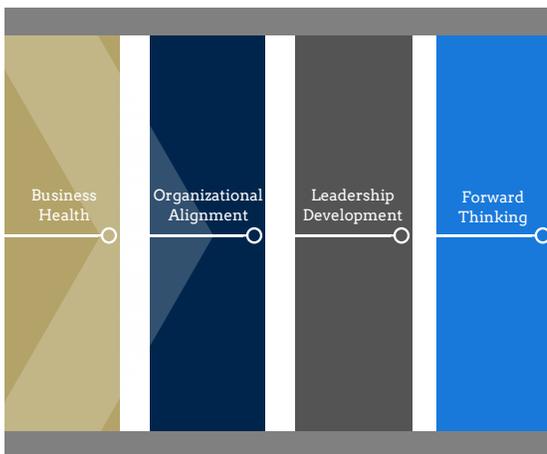

- Adjusted documentation to align with the organization's practices.
- Developed a common understanding around environmental policies.
- Met ISO 14001 requirements and maintained registration.

»»» Why Work with GaMEP?

Our goals are simple and impactful:

- Understand the current state of your company.
- Learn about your future goals.
- Teach your team to utilize tools and strategies to meet the needs of your organization.
- Advance your company's competitiveness and ensure a sustainable future for manufacturing in Georgia.

Each of our services resides in one of the following four key strategic solutions pillars within the GaMEP Organizational Excellence framework:

The pillars are interconnected to maximize effectiveness. If you have multiple areas to address, request an Organization Excellence assessment.

»»» What Sets GaMEP Apart

Each year, GaMEP works with more than 1,000 manufacturers to implement on-site projects, conduct training, and connect manufacturers to Georgia Tech resources and our partners throughout the state. We do this through:

- Federal and state funds that help offset the cost to Georgia manufacturers, making your investment more powerful.
- Access to locally based project managers that have years of experience developing and implementing best practices for manufacturers.
- Immediate and long-term solutions that increase top-line growth and reduce bottom-line costs throughout your organization.

Service areas include: process improvement, quality, robotics, business strategy, technology integration, ISO management systems, energy, sustainability, safety integration, and more.

See what all the "Buzz" is about.
