

Food Safety Management System

Implement, audit, and train your team on food safety management systems

Are your customers requiring you to implement a food safety management system? Do you already have a system in place that needs to be audited?

Today more than 50% of food manufacturers and processors have implemented SQF, the Safe Quality Foods Institute management system, or FSSC 22000, the ISO Food Safety management standard, to meet food safety certification requirements, respond to customer demands, and grow their business.

GaMEP can help you implement either of these management systems as well as other GFSI recognized certification programs. GaMEP can also audit your current systems and train your team to gain better value out of your systems.

GaMEP will:

- Conduct a gap audit to determine areas of improvement.
- Help develop an implementation and/or corrective action plan.
- Provide internal auditor training to teach your team how to find opportunities for improvement.
- Coach your food safety team through the implementation and/or audit process.

By working with GaMEP to implement or audit a Food Safety Management System, you will:

Prevent Food Safety Recalls

Increase Customer Satisfaction

Expand Your Marketability

Develop Your Team's Expertise

Food Safety Management Systems in Action

Food Supplier Implements a Formal Food Safety Management System to Expand its Business

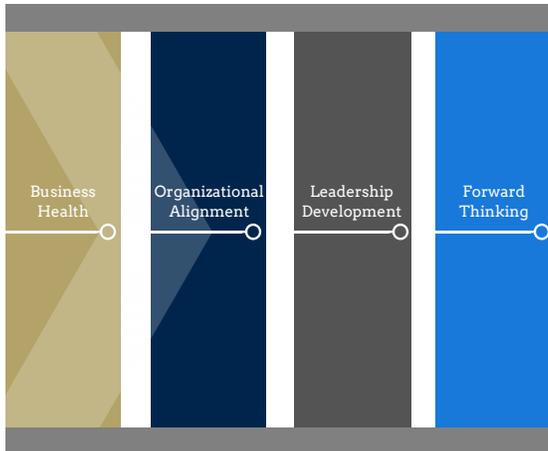

A company that makes aluminum pans for frozen-food manufacturers wanted to make its products more attractive to larger food manufacturers. In order to do so, they needed a formal food safety management system in place. GaMEP worked with the company to discover areas of improvement and developed a corrective action plan. The company is now documenting its processes and within the next six months will be able to pitch to these larger food manufacturers for new business.

Why Work with GaMEP?

Our goals are simple and impactful:

- Understand the current state of your company.
- Learn about your future goals.
- Teach your team to utilize tools and strategies to meet the needs of your organization.
- Advance your company's competitiveness and ensure a sustainable future for manufacturing in Georgia.

Each of our services resides in one of the following four key strategic solutions within the GaMEP Organizational Excellence framework:

The pillars are interconnected to maximize effectiveness. If you have multiple areas to address, request an Organizational Excellence assessment.

What Sets GaMEP Apart

Each year, GaMEP works with more than 1,000 manufacturers to implement on-site projects, conduct training, and connect manufacturers to Georgia Tech resources and our partners throughout the state. We do this through:

- Federal and state funds that help offset the cost to Georgia manufacturers, making your investment more powerful.
- Access to locally based project managers that have years of experience developing and implementing best practices for manufacturers.
- Immediate and long-term solutions that increase top-line growth and reduce bottom-line costs throughout your organization.

Service areas include: process improvement, quality, robotics, business strategy, technology integration, ISO management systems, energy, sustainability, safety integration, and more.

See what all the "Buzz" is about.
