It’s one thing to know and understand the behaviors your managers should possess, but it becomes a game-changer when you and your leadership team are able to exhibit these behaviors throughout different situations that may arise.

GaMEP will bring to you a 360 feedback tool that measures your teams’ leadership abilities on four key facets – transformational leadership, transactional leadership, passive/avoidant, and outcomes of leadership – from the perspective of those that report to you, your colleagues, and your supervisors.

During this process, your team will:

- Take the 360 assessment (approx. 15 min. per person).
- Discover the characteristics of a transformational leader and understand how they measure up to these behaviors.
- Receive individual development plans to make improvements in areas that have been identified as opportunities of advancement.
- Take the assessment a second time to see how they have made strides in becoming a transformational leader.

By completing the questionnaire, you will:

- Identify key behaviors of your managers
- Increase your team's leadership capabilities
- Transform your organization
Our goals are simple and impactful:

- Understand the current state of your company.
- Learn about your future goals.
- Teach your team to utilize tools and strategies to meet the needs of your organization.
- Advance your company’s competitiveness and ensure a sustainable future for manufacturing in Georgia.

Each of our services resides in one of the following four key strategic solutions within the GaMEP Organizational Excellence framework:

- Business Health
- Organizational Alignment
- Leadership Development
- Forward Thinking

The pillars are interconnected to maximize effectiveness. If you have multiple areas to address, request an Organizational Excellence assessment.

Each year, GaMEP works with more than 1,000 manufacturers to implement on-site projects, conduct training, and connect manufacturers to Georgia Tech resources and our partners throughout the state. We do this through:

- Federal and state funds that help offset the cost to Georgia manufacturers, making your investment more powerful.
- Access to locally based project managers that have years of experience developing and implementing best practices for manufacturers.
- Immediate and long-term solutions that increase top-line growth and reduce bottom-line costs throughout your organization.

Service areas include: process improvement, quality, robotics, business strategy, technology integration, ISO management systems, energy, sustainability, safety integration, and more.

See what all the “Buzz” is about.
