

# Total Productive Maintenance

Maintain and improve your production, safety, and quality systems

Total Productive Maintenance (TPM) addresses equipment breakdowns, high maintenance repair costs, missed deliveries and quality problems due to equipment issues in order to achieve the ultimate goal of zero losses.

By eliminating accidents, defects, and unplanned downtime, many companies experience a 30% or better cost reduction and ship on time, every time.

➤ The GaMEP will teach you the steps to implement TPM on equipment throughout your plant by:

- Applying 6S
- Addressing contamination sources
- Inspecting equipment and tag defects
- Establishing daily inspection and lube
- Attacking the six major losses
- Developing advanced productive maintenance systems
- Sustaining process implemented

➤ By implementing TPM, you will:

*Reduce Maintenance Cost*

*Eliminate Downtime*

*Strengthen Workplace Safety*

# Total Productive Maintenance (TPM) in Action

*"Virtual TPM was a great investment for Poly Tech. The team was guided through data collection and analyzing that data to determine the operating efficiency of our equipment. The virtual format and the ability to have teams from other companies participate complimented the process by offering a "fresh pair of eyes".*

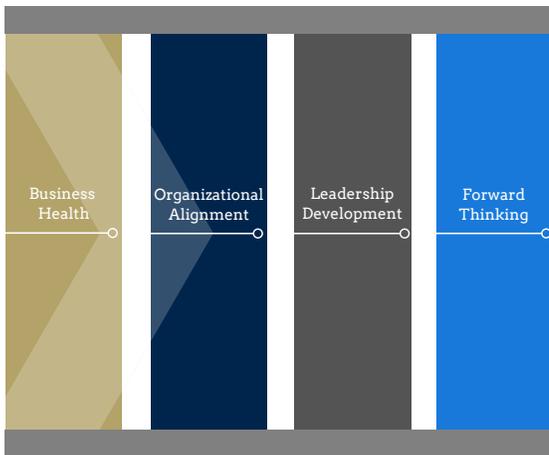

- Jimmy Rabitsch, CEO, Poly Tech Ind.

## Why Work with GaMEP?

Our goals are simple and impactful:

- Understand the current state of your company.
- Learn about your future goals.
- Teach your team to utilize tools and strategies to meet the needs of your organization.
- Advance your company's competitiveness and ensure a sustainable future for manufacturing in Georgia.

Each of our services resides in one of the following four key strategic solutions pillars within the GaMEP Organizational Excellence framework:

The pillars are interconnected to maximize effectiveness. If you have multiple areas to address, request an Organization Excellence assessment.

## What Sets GaMEP Apart

Each year, GaMEP works with more than 1,000 manufacturers to implement on-site projects, conduct training, and connect manufacturers to Georgia Tech resources and our partners throughout the state. We do this through:

- Access to locally based project managers that have years of experience developing and implementing best practices for manufacturers.
- Immediate and long-term solutions that increase top-line growth and reduce bottom-line costs throughout your organization.
- Federal and state funds that help offset the cost to Georgia manufacturers, making your investment more powerful.

*Service areas include: process improvement, quality, robotics, business strategy, technology integration, ISO management systems, energy, sustainability, safety integration, and more.*

See what all the "Buzz" is about.
