

Sustainability

Do you need to ensure compliance with environmental regulations?
Are you ready to decrease your plant's carbon footprint or waste usage?
Do you want to attract new business and increase profitability?

GaMEP helps manufacturers become more sustainable through:

- ISO 14001 Environmental Management System Audits, Implementation, and Training
- Environmental Compliance Assessments
- Water and Wastewater Assessments
- Carbon Reduction Recommendations
- Stormwater Pollution Prevention Plans (SWPPP)
- ISO 45001 Safety Management System Audits, Implementation, and Training
- Integration of Management Systems
- Sustainability Strategy
- Utility Bill Reviews
- Hazardous Waste Handling and Safety Training

Results GaMEP clients have achieved by investing in sustainability:

Decreased pounds of carbon dioxide used per unit produced by 16%

Reduced condensation on production floor, leading to 15% decreased downtime

Integrated ISO 45001 into their existing ISO 9001 and ISO 14001 management systems

Achieved 19.9M gallons annualized water savings, contributing to \$845k total annualized cost savings
